

## Your Regional Plan

### Tons of Freight Shipped Transportation

#### **Metric:**

The annual freight shipping in New Hampshire, according to the New Hampshire Department of Transportation 2011 Scorecard, totals 68,677,213 tons, including air, railway, waterway, and motor carrier transportation.

#### **Geography:**

Upper Valley Lake Sunapee Regional Planning Commission region

#### **Summary:**

This statewide statistic is based on the totals for air, railway, waterway, and motor carrier. This number, however, is only updated every 5 years, and was last calculated in 2009, even though it was reported for 2011. Since the calculation was performed several years ago, it may not be accurate for recent years.
