Educational Attainment Economic Development

Metric:

The educational attainment rates show an increase in both high school graduation rates and bachelor's degrees in the younger generations.

Geography:

Upper Valley Lake Sunapee Regional Planning Commission region

Summary:

The 18-24 year old bracket has a lower percentage of both high school and college graduates. This can be attributed to the 18-24 year old bracket not having finished their education yet.

Educational attainment in a community reflects several things. It reflects the sorts of employment which the community offers - a community with more jobs requiring education will attract more educated people. The high school education metric also reflects the efficacy of the school system in the area.
